My first and last -for now- Android Application experience. This application retrieve random quiz+photo from the server (with RESTAPI) and serve to user. Some features; each question have limited time. User can be use %50 wildcard right. Application is not publishing anymore on the Google Play Market.

11/2019 - present

Fiyat Dedektifi (Price Detective)

Chrome Extension

The extension shows the price history of product prices on predefined sites in the last one month and helps you keep track of discounts on the product. This project help to me learn new things more about Chrome extension working diagram. Google Market Link

06/2019 - present

Sudoku Solve Algorithm with PHP

Brain Training

I'm try coding a resolve algorithm for popular game Sudoku. I'm not finished yet. (it could be solved easy game but not exactly work for hard game)

Skills

PHP and MySql, WHM + cPanel

You can find more information below of projects section.

HTML 5, CSS, jQuery, Bootstrap

You can find more information below of projects section.

Smarty Template Engine

I am using Smarty in my many projects. It is very easy to use and comfortable. I built themes structure (in themes folder) like Wordpress. Thus, our customer can do it any time change web sites front side. I also wrote some core functions (like get contents, get categories, get photos etc) for Smarty in PHP and passed these functions to Smarty with "assign" method.

Payment Gateway Integrations

I can integrate PayPal, Stripe, Iyzico and more other gateway systems.

Twitter & Facebook & Instagram APIs

I can work with famous social media sites APIs like facebook login, get tweets or get Instagram posts.

Chrome Extensions

I published 2 Chrome extensions on Google Market. [Google Market Link](#)

Cordova Hybrid Application

I coded a sample Cordova features application for Android. Application features are content vibration management, barcode reading, take a photo, data insert-edit-delete with Sqlite process. You can download from my website. [Download Link](#)

Python

I keep learning Python. I coded "hangman" game and you can find on my Github profile.

Languages

Turkish	English	German
Native Language	Pre-Intermediate	Elementary

What Do I Do

I bought some helpful videos from udemy.com. I keep learning Python & Machine Learning, Symfony Framework and German language on Udemy. In my free time i like to make coding to improve my business. For example; i wrote license system for work flow to my customers. -i know, PHP is a open source language but i don't share usually source code with them- Each customer have a license key and when came annually renewal time, my system automatic sending to they a SMS a mail notification. (last 30 days, last 7 days etc.) And they can pay annually renewal price online. This system made my job very easier.

Interests

- **Gaming:** FIFA Series, FM Series, Assasin's Creed Series, Dying Light
- **Music:** Rammstein, Metallica, Danheim, IAMX, Massive Attack
- **Football:** Borussia Dortmund (I visited 3 times Signal Iduna Park)
